CARIBBEAN

PREFACE

These Guidelines and accompanying Checklists have been prepared by the Caribbean COVID-19 Tourism Task Force to support a consistent and harmonized strategy, as far as possible, in the phased approach to the recovery of Caribbean tourism and to minimizing health safety risks to visitors and residents in the operation of tourism businesses.

The members of the Task Force include: the Caribbean Public Health Agency (CARPHA), the Caribbean Tourism Organization, the Caribbean Hotel and Tourism Association, the Organization of Eastern Caribbean States, and the Global Tourism Resiliency and Crisis Management Center.

This document, therefore, establishes core guidelines and protocols aimed at protecting residents and visitors in the reopening and continued operation of tourism services, while simultaneously allowing tourism service providers to be effectively re-established.

The Guidelines are part of a series of documents which describes core protocols initially for four key tourism sub-sectors – Ground Transportation, Accommodations, Food and Beverage Operations and Sites and Attractions. These offer services at critical points on the continuum of the traveler's experience at the destination.

It is, therefore, of paramount importance that these services provide a heightened level of quality and health safety assurance to support business success in the new normal of a COVID-19 environment.

The guidelines are not meant to displace, but rather complement, those which are adopted by destinations and companies. They are intended to advance basic guidelines at a destination level, as well as core measures

at sectoral levels, collectively aimed at building resident and visitor confidence and enabling the Caribbean to remain a top destination for visitors.

This document incorporates guidelines and protocols issued by a range of destinations, industry enterprises and regional agencies and are further synced with global protocols including those of the World Health Organization (WHO), the World Tourism Organization (UNWTO), and World Travel and Tourism Council (WTTC). For businesses that apply the guidelines and protocols, the intention is to acknowledge their efforts through a Regional Recognition Program of the Caribbean Public Health Agency (CARPHA) and collaborating partners of the Task Force.

This document has been prepared based on evidence and information currently available on the "Severe Acute Respiratory Syndrome Coronavirus 2 (SARS-CoV-2)", i.e. COVID-19. The Guidelines are, therefore, subject to re-evaluation and adjustments as information on COVID-19 evolves, as new and more efficient solutions become available and with the development of a treatment or widely accessible vaccine for COVID-19.

Implementation of relevant protocols are necessary by all tourism service providers across the region to ensure the successful recovery of Caribbean tourism. Caribbean destinations and tourism services providers are accordingly encouraged to adopt and implement the guidelines and protocols as appropriate.

Health & Safety Guidelines & Checklist

For Reopening of Caribbean Tourism & Travel

ASSOCIATION

CARPHA-CTO-CHTA-OESCS-GTRCMC COVID-19 Task Force

CARPHA-CTO-CHTA-OECS-GTRCMC COVID-19 Task Force

CARIBBEAN
HOTEL & TOURISM
ASSOCIATION

The CARPHA-CTO-CHTA-OECS-GTRCMC COVID-19 Task Force supplements CARICOM's efforts to extend core health safety protocols throughout the region aimed at minimizing the risk to residents and employees of contagion from COVID-19.

The COVID-19 Task Force is comprised of representatives from the Caribbean Public Health Agency (CARPHA); the Caribbean Tourism Organization (CTO); the Caribbean Hotel and Tourism Association (CHTA), Global Tourism Resilience and Crisis Management Centre (GTRCMC), and the Organization of Eastern Caribbean States (OECS) Commission, and was tasked to:

1. Inventory and Review existing COVID-19 Health Safety Standards and Identify Core Regional Standards and Sub-sector Standards for consideration as part of Regional Protocols;
2. Identify the Core Protocols required for the Regional Recognition Program of CARPHA and collaborating partners;
3. Develop Supporting Documents – inclusive of Checklists, and
4. Identify Training Needs and Develop a Staged Training Plan.

CARIBBEAN TRAVEL HEALTH ASSURANCE STAMP (CTHAS)

CTHAS will be issued by CARPHA for accommodation facilities which are registered on THiS and meet CARPHA COVID-19 health and safety protocols. This regionally recognized stamp of approval will be the only such recognition worldwide to be issued by a health agency to acknowledge that health standards are met for tourism.

The stamp will add to assuring travelers that health safety is of priority in their stay at the recognized property while in the Caribbean. The intention is for CTHAS to be available to tourism service providers initially in the accommodation sector and later for other tourism sub-sectors.

CLEANING, SANITIZING AND DISINFECTING

Cleaning, sanitizing and disinfecting are considered three (3) levels of the cleaning process¹, i.e.

- 1. Cleaning:** To remove dirt, soils, debris and impurities from surfaces. This involves soaps and detergents and removes germs like bacteria or viruses but does not necessarily kill them. Hot or cold water may be applicable;
- 2. Sanitizing:** To reduce bacteria on a surface by at least 99%. This kills a high percentage of germs that are on surfaces and can be done by heat or chemicals. It may not eliminate all the presence of bacteria, viruses and mould and does not prevent growth; and
- 3. Disinfecting:** To kill a wider range and higher percentage (99.99%) of microorganisms (than sanitizers) on a surface. This is done with chemical and requires a certain amount of contact time. Items that will contact food or be used in the mouth must be thoroughly rinsed after disinfecting.

CDC recommends wearing gloves when you are cleaning or caring for someone who is sick. Otherwise, washing hands for 20 seconds with running water and wearing face coverings along with other preventative measures such as physical distancing and using hand sanitizers are seen as most appropriate for daily activities.

HAZARD ANALYSIS CRITICAL CONTROL POINTS (HACCP)

HACCP is an internationally recognized method of identifying and managing food safety related risk and, when central to an active food safety program, can provide customers, the public, and regulatory agencies assurance that a food safety program is well managed.

TOURISM SERVICE PROVIDERS

This term covers all individuals, businesses and entities in hospitality, travel and tourism that offer services to visitors in the destination. These include those in all of tourism's sub-sectors including Accommodation, Transportation, Food and Beverage; Entertainment and Recreation (including Sites and attractions); Meetings, Incentives, Conferences and Events (MICE); and Other Tourism Support and Related Services.

TOURISM HEALTH INFORMATION SYSTEM (THiS)

THiS is a real-time, web-based application developed by the Caribbean Public Health Agency (CARPHA) to monitor for illnesses and potential outbreaks in visitor accommodations (Hotels, Guest Houses etc.) and to facilitate a confidential early warning and rapid response. THiS is intended to strengthen regional and national health systems and to enhance the health safety of staff, residents and visitors and the quality, reputation and sustainability of Caribbean tourism.

Through THiS, facilities and countries can proactively monitor COVID-19 syndromic trends and illness of visitors. Self-monitoring can be done by guests themselves. Plans are underway to extend THiS to service providers in other tourism sub-sectors.

¹ Based on CARPHA Interim COVID-19 Health Guidelines for Hospitality: Hotels and Guesthouses. Healthier, Safer Tourism

USE OF GREEN/ENVIRONMENTALLY SAFE AND RECYCLED PRODUCTS

COVID-19 requires increased cleaning, sanitizing and disinfecting and the use of personal protective equipment (PPE) to ensure health safety - all of which can make use of safer products and tools to avoid harming staff, visitors and the pristine environment promoted by destinations across the Caribbean.

Use of eco-products that achieve the health safety requirements of COVID-19 and recognized through testing and certification by third party groups such as Green Seal, Ecologo and the EPA's Design for the Environment, is encouraged. Reducing the use of plastics, where possible, is also encouraged, e.g. digital mobile phone room entry instead of plastic room key cards.

WHAT IS COVID – 19?

COVID-19 is a new strain of coronavirus first identified in Wuhan City, China in December 2019. It was first noted that it usually takes 2 to 14 days for someone to show signs of infection after having come into contact with someone with the disease. This 2019 virus is a new strain of coronavirus that has not been previously identified in humans.

HOW COVID-19 SPREADS

There are 2 main routes by which people can spread COVID-19:

- ✓ By the respiratory droplets of an infected person (who coughs or sneezes) to people who are within 2 meters/6 feet, i.e. it is spread person to person, and
- ✓ By touching a surface, object or the hand of an infected person that has been contaminated with respiratory secretions AND then touching their own mouth, nose, or eyes (e.g. touching door knobs or shaking hands then touching own face)

COVID-19 SYMPTOMS²

The most common symptoms of COVID-19 are:

- ✓ Fever
- ✓ Dry cough, and
- ✓ Tiredness

People of all ages who experience fever and/or cough associated with difficulty breathing/shortness of breath, chest pain/pressure, or loss of speech or movement should seek medical attention immediately.

Other less common symptoms that are usually mild and begin gradually include:

- ✓ aches and pains
- ✓ conjunctivitis
- ✓ loss of taste or smell
- ✓ nasal congestion
- ✓ sore throat
- ✓ rash on skin
- ✓ headache
- ✓ diarrhea
- ✓ discoloration of fingers or toes

- Some persons may show no symptoms (asymptomatic), but are positive
- According to WHO, most people (about 80%) recover from the disease without needing hospital treatment.

Organisation of Eastern Caribbean States

CARPHA-CTO-CHTA-OECS-GTRCMC COVID-19 Task Force

September 2, 2020

As travel restrictions are lifted internationally in tourism generating countries and airlines resume flights to the region, CARPHA has issued Health Guidelines for the Hospitality Sector to support the health safety of residents and visitors as destinations across the Caribbean reopen for tourism.

These Guidelines are based on six (6) foundational principles needed in the restart and operation of tourism in 2020 and beyond. The recommendation is for these principles to permeate the COVID-19 measures and protocols of destinations and of tourism service providers.

CARPHA GUIDELINES

- ✓ Lift Travel Restrictions in accordance with WHO Criteria and CARICOM Common Protocol;
- ✓ Build Consumer Confidence by establishing Healthy Practices in the Destination;
- ✓ Reconfigure Hospitality Businesses to follow Physical Distancing and other Health Safety Practices;
- ✓ Institute Proactive COVID-19 Traveler's Health Practices;
- ✓ Heighten Public Education and Communication including for Employees and Visitors; and
- ✓ Sustain Permanent Partnerships among State and Non-State Actors on the Value Chain.

SIX KEY CRITERIA³

These guidelines should be supported by the following six (6) criteria in each destination:

1. LOW LEVELS OF COVID-19 INCIDENCE

This is the main pre-requisite for resuming tourism activities in any destination.

It must be based on epidemiological evidence which shows that the spread of COVID-19 in that specific destination has significantly decreased and stabilized for a sustained period of time and is likely to remain stable with the increased tourist population.

2. HEALTH SYSTEM CAPACITY

The tourism sector must assess availability of and access to sufficient health care.

Sufficient health system capacity should be available for both residents and tourists so that, in the event of a sudden increase in cases, the health system is not overwhelmed. This is particularly important in areas that can expect higher rates of visitors due to the capacity of their tourism plant, i.e. large hotels and resorts, and the type and distance from healthcare infrastructure, e.g. homestay and vacation rental away from the regular thoroughfare.

If tourist areas have limited health care services and a considerable number of additional visitors can be expected, there arises a need for implementing additional response mechanisms, such as medical evacuation flights to, for example, medical facilities on neighbouring islands in the region.

³ Adapted based on EU/WHO, May 13, 2020: COVID-19: EU Guidance for the Progressive Resumption of Tourism Services and for Health Protocols in Hospitality Establishments: https://ec.europa.eu/info/sites/info/files/communication_tourismservices_healthprotocols.pdf

3. SURVEILLANCE & MONITORING CAPACITY

Systems must be in place to monitor and respond to changes in indicators of health service capacity.

Increased surveillance and monitoring capacity on a local level are required to prevent introduction of the virus through travelers as well as spread from local populations to tourists. To support capacity, destinations should make use of CARPHA's real-time Tourism Health Surveillance and Monitoring Systems (e.g. THiS) if no current system of monitoring travelers health is used by a destination.

THiS is a confidential, web-based application for real-time syndrome surveillance of populations in tourism accommodations. This application was designed to enhance national surveillance systems by monitoring illnesses in tourist accommodations to identify public health threats in real-time in order to promote rapid response and disease spread.

Destinations using THiS would be meeting a key criterion in Caribbean travelers' health assurance and would be identified in Caribbean Traveler's apps as a recognized destination.

4. TESTING CAPACITY

A pivotal criterion in the restart and continued operation of tourism activities is testing to detect cases, monitor the spread of the virus and to slow down or impede transmission.

Recognizing the practices to date that have undergirded the Caribbean's success in containing the spread of COVID-19, we recommend that a robust testing mechanism for visitors, returning residents and citizens be a part of a destination's border entry requirements at this stage in the pandemic.

If pretesting in the country of origin is either not possible or practical within 72 hours of travel, protocols should be established by the host destination which provide for testing upon arrival. In all cases, passengers should be formally notified in advance of travel of all entry requirements at the destination as well as with respect to any specific protocols that will be expected e.g. wearing of face coverings, corporal temperature screening, etc. Additionally, passengers should be clearly advised in advance of travel of all details related to isolation requirements should they test positive for COVID-19 on arrival or at any point during their stay. Passenger must agree in advance of travel to abide by the protocols and laws of the host destination.

Robust testing means the Reverse-Transcription Polymerase Chain Reaction Test, i.e. RT-PCR which is currently the only test that detects SARS-CoV-2 with accuracy. This test has been recommended by the WHO, as persons at any stages of a SARS-CoV-2 infection can test negative when tested with a rapid antigen- or antibody-based tests. If in the course of time other tests become available that demonstrate more than 90% specificity and sensitivity (but ideally more than 95%) done within 72 hours before departure for the Caribbean, that test will be equally as acceptable.

Destinations should clearly communicate to all travelers and potential travelers the testing and general health safety protocols which they have established. This should stipulate the proof of testing documentation which is required for entry.

⁴ this.carpha.org

5. CONTACT TRACING IS AVAILABLE

Contact tracing is an effective and essential public health measure for the control of COVID-19.

The aim is to promptly identify and manage contacts of COVID-19 cases to reduce further onward transmission. Ideally, such contact tracing must allow the sharing of relevant information between countries. This must, however, be balanced against any relevant data protection regulations nationally, regionally and internationally.

6. COORDINATION AND COMMUNICATION MECHANISMS

Coordination and communication between and among tourism stakeholders is necessary.

Mechanisms must be in place to allow for this between local authorities, organizations (i.e. NHTAs) and tourism service providers and between national governments within the region. In addition, cross-border coordination, information-sharing and communication are essential, particularly as Caribbean intra-regional tourism opens. Risk communication for visitors is also vital to ensuring they are informed about the local context and, for example, measures to follow in case of suspected COVID-19 cases.

CHECKLIST OF KEY CRITERIA TO CONSIDER IN THE REOPENING OF TOURISM

This Checklist Allows Quick Assessment of the Situation at the Destination to support the Effective Reopening of Tourism

<input checked="" type="checkbox"/> = Yes: <input checked="" type="checkbox"/> = No <input type="checkbox"/> = Not Applicable					
1. LOW LEVELS OF COVID-19 INCIDENCES

CARPHA-CTO-CHTA-OECS-GTRCMC COVID-19 Task Force

September 2, 2020

Ground Transportation; Accommodation; Food & Beverage; Recreation & Entertainment including Sites & Attractions; Meetings, Incentives, Conference & Events (MICE); and Tourism Services

TARGET GROUP

These Guidelines are earmarked for Hospitality and Tourism Service Providers in the Caribbean including Retailers, Vendors and Public Markets at the destination.

FOCUS

Building User Confidence and Assurance in Tourism Service Delivery by ensuring that Health Safety Protocols are in place at key points in the Tourism Experience and Visitor Service provided.

PRIORITY

- ✓ Protecting Jobs and Livelihoods by Providing Health Safety & Quality Service
- ✓ Reconfiguring Business Operations to Minimize Health Safety Risks and to Protect the Safety of Employees, Visitors and Guests
- ✓ Integrating Technology, Digitization and Innovation
- ✓ Education and Training
- ✓ Clear Communication and Messaging
- ✓ Collaboration and Partnerships

REQUIREMENT

The guidelines and protocols must be adapted according to Size, Staff Number and Nature of the Tourism Service provided. Ultimately, they must be based on the National/Local Requirement at the destination.

SEVEN (7) COMMON HEALTH SAFETY ELEMENTS

1.

PHYSICAL DISTANCING

2.

INFECTION PREVENTION

Coughing & Sneezing Etiquette;
Hand Hygiene
Face Mask, PPE

3.

INFECTION CONTROL

Ventilate, Clean
Sanitize, Disinfect

4.

MONITORING

Temperature Checks

5.

RAPID RESPONSE & REPORTING

6.

TRAINING

7.

COMMUNICATION & MESSAGING

REQUIRED PRIORITY GUIDELINES

SPECIFIC COVID-19 HEALTH SAFETY MEASURES

Implementation of the following five (5) Special Health Safety Measures for Staff, Guests/Patrons, Facilities, and the Services provided as part of the Visitor Experience, is necessary:

1. PHYSICAL DISTANCING:

✓ Targeted Measures

This should be put in place in communal areas where staff, guests, patrons and visitors are likely to gather for prolonged periods, i.e. longer than 15 minutes. In principle, a distance of 5 to 6 feet or approximately 1.5 to 2 meters should be applied except for persons traveling together.

Protocol may include establishing a maximum number of staff, guests, patrons and visitors allowed in any common facility and in vehicles or water vessels, e.g. restaurants, bars, lobby, loading zones, attraction rides/tours, taxis. Reduced carrying capacity at all sites must be considered. This may require allocating booking slots, e.g. for meal times, tours, pool/gym use.

✓ Alternative Measures

When physical distancing cannot be fully observed, alternative measures of protection may be used such as sneeze guards, impermeable barriers and wearing of face coverings. Careful consideration should also be given to whether some services should temporarily remain closed, e.g. childcare facilities, and to outdoor seating opportunities where possible. Large scale events should also be temporarily postponed.

2. INFECTION PREVENTION AND CONTROL (IPC)

These include specific personal protective measures, ventilation and cleaning, sanitizing and disinfection protocols. These must be considered, communicated to staff, guests, patrons and visitors and implemented accordingly:

✓ Personal Protective Measures

(i) Respiratory Etiquette: Strict respiratory etiquette should be communicated and followed (coughing or sneezing into a paper tissue or the elbow bend) by staff, guests, patrons and visitors. Tourism service providers should ensure the availability of paper tissues and contactless or foot-pedal garbage bins.

(ii) Hand Hygiene : Hand hygiene is an essential control measure. Hands must be washed thoroughly and often, using soap and water for a minimum of 20 seconds. Hand hygiene practices should be communicated to staff, guests, patrons and visitors through infographics at key areas/facilities, e.g. at entrances, in washrooms, at the cashier, elevator entrance, etc.

Tourism service providers should ensure easy access to hand washing facilities with soap, hand sanitizer (in all areas, particularly in high traffic areas), use of contactless faucets and dispensers as far as possible, or contactless automatic dryers.

NB: Alcohol-Base Level for Sanitizers: Alcohol-Based Hand Sanitizers 60% alcohol or above may be used for personal hand sanitation purposes. For All other purposes, i.e. for cleaning, disinfecting and sanitizing surfaces, 70% alcohol or above is required.

⁹<https://www.who.int/docs/default-source/inaugural-who-partners-forum/who-interim-recommendation-on-obligatory-hand-hygiene-against-transmission-of-covid-19.pdf>

(iii) Use of Face Covering ⁷: The use of face covering, which includes face masks or other shields, should be worn by staff, guests, patrons and visitors, particularly in communal areas and public-facing situations when interactions with others is required.

Vulnerable and High-Risk Groups: Staff, guests, patrons and visitors in Vulnerable and High-Risk Groups⁸ must use a face covering at all times.

According to WHO, COVID-19 is often more severe in people who are older than 60 years or who have health conditions like lung or heart disease, diabetes or conditions that affect their immune system. These are among the Vulnerable and High-Risk Groups.

Appropriate use of face covering is important and should be communicated to staff, guests, patrons and visitors. Face-covering must not replace core preventive measures.

✓ Ventilation

Increasing the number of air exchanges per hour and supplying as much outdoor air as possible is recommended - either by natural or mechanical ventilation, depending on the facility. For example, increased ventilation of guest rooms for at least one hour after check-out is suggested.

Cleaning of HVAC systems should be increased and air filters replaced more frequently in indoor spaces. The use of high-grade filters in enclosed spaces similar to aircraft cabins and elevators, is an option that may be explored.

A time log should be kept for documentation of all cleaning and upkeep undertaken.

✓ Cleaning Measures

There are three (3) levels of cleaning, i.e. Cleaning, Sanitizing and Disinfecting. Each is important to ensure the health safety of staff, guests, patrons and visitors. Cleaning of high touch surfaces as often as possible (at least daily and, if possible, more frequently, i.e. after use, hourly or at least once every two hours) is required.

Example of Key High Touch Point and Surfaces

- Doors
- Door Handles & Knobs
- Windows & Coverings
- Seats and Chairs
- Seat Belt Buckles
- Arm Rests
- Hand Rails
- Grab Handles
- Table-tops
- Bar/Counter tops
- Check-in/Payment Counters
- Point-of-Sale Terminals
- Dining Surfaces
- Food Preparation Surfaces
- Sinks, Faucets & Taps
- Keys and Locks
- Steering Wheels
- Driver/Vessel Controls
- Light and AC Control Panels
- Remote Controls
- Elevator Buttons
- Touch Screens & Tablets
- Staff PCs
- Telephones
- Pool/Water Safety Equipment
- Gym Equipment
- Vending & ATM Machines

⁷ Major health organizations, including the CDC and WHO, have urged people to only use medical grade face masks if they are ill, so as not to spread the virus to others, or if they are a Health Care Provider

⁸ <https://www.who.int/westernpacific/emergencies/covid-19/information/high-risk-groups>

As a general rule, staff should:

- Prior to disinfecting, clean with detergent or soap and water if the surface is visibly dirty.
 - Wear gloves⁹ and a mask and other protective equipment as required by the product instructions during cleaning and disinfecting.
 - Perform good hand hygiene before and after cleaning.
 - Always follow the instructions on the cleaning agents for how to dilute and apply to different surfaces.
 - Perform the procedure of cleaning and sanitizing after the end of the service provided, e.g. at check-out (for rooms); after drop-off (for ground transportation and water tours).
 - Be trained on manufacturer's directions and the Occupation, Safety and Health Administration (OSHA) requirements for safe use of cleaning chemicals.
 - Trained in the treatment of cleaning equipment, waste management and laundry. For laundry services, in addition to washing items in accordance with the manufacturer's instructions, staff should be aware of the CDC¹⁰ guidelines and the circumstances for use of cold or hot water.
 - Be made aware of personal hygiene required following cleaning.
-
- **Chemicals:** When choosing cleaning chemicals, products approved for use against COVID-19 should be considered. Eco-friendly or other disinfectants labeled to be effective against emerging viral pathogens should be used. Bleach alternatives should be applied as far as possible. If used, diluted household bleach solutions (5 tablespoons per gallon of water according to the manufacturer's instructions). Alcohol solutions with at least 70% alcohol that are appropriate for the surface should also be utilized accordingly.
 - **NB:** For personal use Alcohol-Based Hand Sanitizers with 60% alcohol or above may apply. Eco-Friendly Cleaners, Sanitizers and Disinfecting Chemicals, and Recycled Products should be used, as far as possible, for continued support to climate change mitigation and to maintaining the pristine environment of the region.

3. SCREENING AND TEMPERATURE CHECKS FOR SYMPTOMS OF COVID-19

✓ COVID-19 Symptoms ¹¹ (WHO)

The most common symptoms of COVID-19 are fever, dry cough or cough associated with difficulty breathing/ shortness of breath, chest pain/pressure, and tiredness. Other symptoms that are less common include aches and pains, nasal congestion, headache, conjunctivitis, sore throat, diarrhea, loss of taste or smell or a rash on skin or discoloration of fingers or toes. These symptoms are usually mild and begin gradually.

Screening Questions: Suggested screening questions for COVID-19 symptoms for staff, guests, patrons and visitors are:

- Have you been in close contact in the past 14 days with a confirmed case of COVID-19?
- Have you been diagnosed with COVID-19?
- Have you been told by a health care provider or public health official to self-quarantine?
- Are you experiencing a cough, shortness of breath/difficulty breathing, chills, muscle pain, new loss of taste or smell, or sore throat?
- Have you had a fever in the last 48 hours?
- Have you had vomiting or diarrhea in the last 24 hours?
- Have you had a fever in the last 48 hours?
- Have you had vomiting or diarrhea in the last 24 hours?

⁹ CDC recommends wearing gloves when you are cleaning (or caring for someone who is sick).

¹⁰ <https://www.cdc.gov/infectioncontrol/guidelines/environmental/background/laundry.html>

¹¹ <https://www.who.int/emergencies/diseases/novel-coronavirus-2019/question-and-answers-hub/q-a-detail/q-a-coronaviruses>

✓ Temperature Checks

Fever, remains among the key symptoms displayed and, due to this, screening by temperature checks for employees, guests, patrons and visitors is an essential measure. An elevated temperature of over 100.4 degrees Fahrenheit (F) or 38 degrees Celsius (C) is cause for concern.

General Rule: Employees, guests, patrons and visitors must be screened with the use of a no-touch thermometer to ensure that temperatures are not elevated over 100.4 degrees Fahrenheit (F) or 38 degrees Celsius (C).

Staff:

- Employees should undergo daily temperature screening at the start of their shift/work day. Online monitoring forms should be considered for recording temperature checks
- Staff with elevated temperatures, i.e. over 100.4 F or 38 C, should not be allowed to work but should be sent for further screening at a designated health facility - on site if one is available or at the designated public or other facility off site
- Staff should stay at home if they are unwell and/or if they, or a household member, exhibit COVID-19 symptoms
- Staff with elevated temperatures or exhibiting COVID-19 symptoms should be tested

Guests, Patrons and Visitors:

- At accommodation facilities, temperature screening for guests, should be done on a regular basis during their stay
- Temperatures of patrons and visitors should be taken prior to commencing a tourism activity or tour, e.g. transportation, restaurant services, and at sites and attractions.
- Persons displaying elevated temperatures should not participate in planned activities, but local health authorities should be advised to facilitate screening and possible testing.

4. REAL-TIME MONITORING, RAPID RESPONSE AND REPORTING/CONTACT TRACING

✓ Monitoring & Rapid Response Reporting

Tourism service providers must rapidly respond and report any changes, on a real-time basis, that may escalate risk to contagion to local authorities for immediate action. Due to this, it is best if systems are in place for real-time monitoring of the health of staff, guests and patrons, where appropriate. Where possible, applications should be utilized, such as CARPHA'S THiS, for confidential early warning, response and real-time monitoring of illnesses.

✓ Contact Tracing: Contact details of employees, guests, patrons and visitors must be available in case they are needed for contact tracing. In the absence of formal contact tracing apps, guests and visitors should, at the minimum, be encouraged to keep their smart phone location sensor on for the duration of their stay to facilitate contact tracing around the destination.

Contact tracing measures must be strictly limited for the purpose of dealing with COVID-19 outbreak and established according to rules, which ensure the highest level of privacy and data protection.

GUIDELINES

SYMPTOMATIC VISITOR MANAGEMENT REPORTING PROCESS

The following CDC-approved five-step process must be implemented if staff, guests, visitors or patrons exhibit elevated temperatures and COVID-19 “Influenza-Like” symptoms. This is intended to assist the person and to protect everyone from potential COVID-19 transmission as quickly as possible.

5. SUPPLIES ¹²

✓ Checklist of General Supplies/Eco-Friendly Products

Tourism service providers must rapidly respond and report any changes, on a real-time basis, that may escalate risk to contagion to local authorities for immediate action. Due to this, it is best if systems are in place for real-time monitoring of the health of staff, guests and patrons, where appropriate. Where possible, applications should be utilized, such as CARPHA'S THIS, for confidential early warning, response and real-time monitoring of illnesses.

While supplies will vary depending on the service and activity, general and basic supplies will include where applicable:

- Thermometers: Infrared No-Contact Hand-Held Thermometers (minimum of four - two per entrance and two for staff) and/or Full Body Thermal Scan - one per entrance
- ISO Masks (PAPRs, CAPRs, N95s), enough for each staff for each shift to have at least one
- Face Shields and Protective Eyewear
- Bag (disposable for possibly contaminated items. Bags should be made from recycled or eco-friendly material as far as possible)
- Disposable Gloves¹³ (mainly for cleaning and made of recycled or eco-friendly material)
- Disposable Aprons
- Alcohol-Based Hand Sanitizer (60% alcohol or above for personal use by employees/guests/patrons)
- Spray Disinfectant/Wipes
- Cleaning Disinfectant
- Cleaning Sanitizers (70% alcohol base or above)
- Paper napkins or towels preferably provided in contactless dispensers
- Contactless Soap Dispensers
- Hands-Free Garbage Bins with Covers
- Contactless Automatic Dryers for Drying Hands
- Measuring Device (tape measure, yardstick, 6 ft. pole etc.)
- Indicators (flags, markers, stakes, cones, tapes, stickers etc.)
- Signage for Protocols, Awareness regarding Symptoms & Contact Information

¹² In consideration of elements of WHO COVID-19 Essential Supplies Forecasting Tools of April 29, 2020 <https://www.who.int/who-documents-detail/covid-19-essential-supplies-forecasting-tool>

¹³ CDC recommends wearing gloves when you are cleaning or caring for someone who is sick. Otherwise, washing hands for 20 seconds with running water and wearing face masks along with other preventative measures such as physical distancing and using hand sanitizers are seen as most appropriate for general daily activities.

✓ Delivery of Supplies

Attention must also be paid to the procedures involved in receiving the delivery of all supplies (including food) to ensure consistency of health safety across all service points in order.

Delivery personnel should:

- not be allowed to drop-off supplies without the use of a mask or face covering
- undergo temperature checks on entry to the delivery/drop-off point on the property/site/office
- practice hand hygiene and cough etiquette
- be denied entry if their temperature is elevated; and
- with elevated temperatures, be documented

Reporting

- Instances where entry is denied due to elevated temperature or visible symptoms must be reported to the relevant health authority on a real-time basis
- Receiving Supplies
- Delivery receiving areas must be kept clean and disinfected after each delivery
- Products must be removed from external containers or packaging before storage. Where this is not possible or practical, clean and sanitize packages and containers as appropriate prior to storage.

Receiving Supplies

- Delivery receiving areas must be kept clean and disinfected after each delivery
- Products must be removed from external containers or packaging before storage. Where this is not possible or practical, clean and sanitize packages and containers as appropriate prior to storage.

OTHER NECESSARY GUIDELINES

Guidelines in this category fall under the following **six (6) broad headings:**

1. MANAGEMENT OPERATION

Management, which covers the owner or operator of tourism services, must set the direction to successfully achieve the priority areas and health safety objectives by implementing the following Measures and Protocols:

✓ Local Regulatory Compliance

All tourism enterprises and services must comply with National Legislative and Regulatory requirement related to the tourism service and/or business activity in which they are involved.

✓ Preparedness & Action Plan Development

An official COVID-19 Preparedness & Action Plan is necessary. This must allow for assessment of the visitor experience and staff assurance at all facilities and service points and the outline of Special Policies and Standard Operating Procedures (SOPs) adjusted for heightened health safety.

Specific actions to be taken in case of infection should be outlined within an established Quarantine Procedure. The role and responsibilities of staff should be detailed, presented to each staff and made available at all times.

✓ COVID-19 Health Safety Management Team and/or Point Person

This protocol allows for an assigned COVID-19 Manager or Person to continually support, assess and ensure that protocols are being enacted. Large companies and those with multiple locations for operations should consider designating a team.

✓ Local Coordination Arrangements & Partnerships

Communication and constant coordination are required at the local level between Ministries/Departments of Health; Tourism Ministries/Departments/Boards and Hotel and Tourism Associations and Tourism Service Providers. This is to ensure that the latest rules and regulations in any given geographical area are shared, applied and their implementation monitored.

Partnerships for additional support such as capacity development and human resources training must also be facilitated. This will further enable a wider participation in decision making and in ownership and uptake of the decisions made.

2. HUMAN RESOURCES & TRAINING

Human resource remains a central factor in the delivery of the tourism service. Managing staff and ensuring health safety and quality service standards must now take on different approaches and heightened levels as these too must adapt to requirements brought on by COVID-19.

✓ Management of Staff

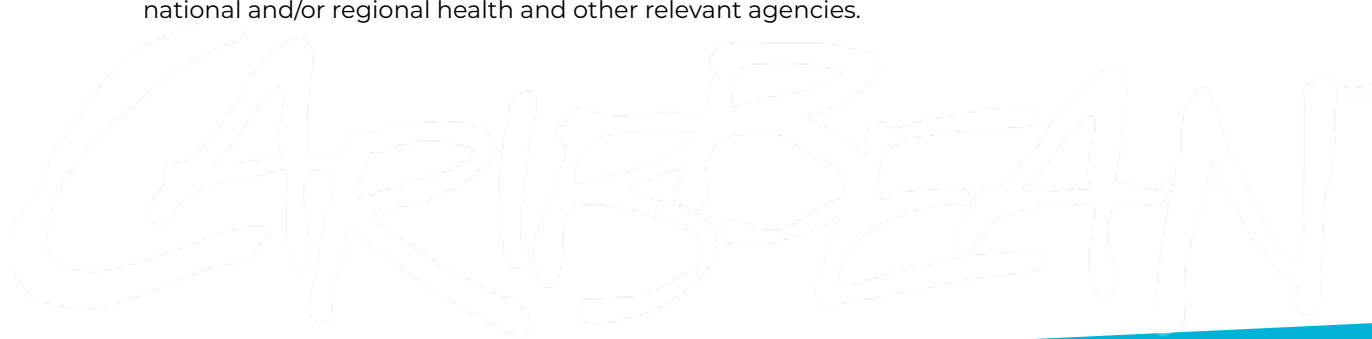

Measures that decrease the physical presence of staff at the workplace should be considered. Staff such as those performing duties that may be compatible with teleworking, could be encouraged to work from home. As a temporary measure, staff with serious underlying conditions, may need to be placed in other functional areas based on the level of physical interaction required.

✓ Comprehensive Training & Capacity Development Plan

A COVID-19 Compliant Comprehensive Training Plan is necessary. A collaborative approach should be taken in the implementation of the training plan. This collaboration and partnership with Ministries of Tourism and Health as well as with National Tourism Sector Associations and similar Regional Tourism Agencies, such as the CTO and CHTA should be undertaken. These agencies are also involved in COVID-19 tourism training and capacity development. The Plan can, therefore, leverage the training of these agencies allowing resources to be utilized more effectively.

The Training and Capacity Development Plan should also consider the emotional impact of this COVID-19 crisis and its related “Paradigm Shift” on all persons in the tourism sector, which, in the case of employees, must be continually monitored and assessed.

Allowances for Counseling and Coaching must, therefore, be included as part of the capacity development and training program of tourism services providers. This likewise, should be done in collaboration with national and/or regional health and other relevant agencies.

✓ Training and Capacity Development Focus Areas

Capacity development to deliver quality COVID-19 compliant service must now be at the forefront of awareness building and training.

Staff involved in providing a tourism service must be aware of “All Things COVID-19”, with additional considerations made to mitigate emotional consequences due to COVID-19 that may impact negatively on the workplace and in the delivery of the tourism service.

Training and capacity development should include:

- COVID-19 Causes and Symptoms
- Physical Distancing Measures for the Workplace
- Infection Prevention and Control (IPC) Measures & Personal Protection, including use of face covering and other personal protective equipment (PPE)
- New cleaning, sanitizing, and disinfecting practices, along with manufacturers' instructions for the use of products for these purposes
- Monitoring and Reporting
- Rapid Response Actions (required if staff or guests/visitors present symptoms)
- Implementing Quarantine Protocols
- Interacting with visitors/guests and other staff
- Customer Service in the COVID-19 Era
- Sales and Selling Skills in a COVID-19 Era
- First Aid in a COVID-19 Environment
- Post COVID-19 Staff Counseling and Coaching Techniques

3. COMMUNICATION & INFORMATION

Information must be continually communicated to employees and visitors. Communication must also flow effectively among partners and stakeholder authorities national and regionally.

✓ Information for Staff

Staff must inform and be informed regularly on all matters related to health and safety procedure, policies, operations, and expectations. Likewise, the information must be reliable, consistent and easily accessible and must be reinforced verbally and by other digital means.

✓ Information for Visitors

For visitors, communications on protocols and measures in place and their role and responsibility, must begin before their arrival at the destination. The information must also include current national guidelines of the government and local health authority. The information must be reliable and consistent. This information can be reinforced and further detailed or expanded at touch points on site as they utilize the tourism service.

✓ Communication Modes/Signage

Information must be easily accessible including through digital means – online/via Short Message Service (SMS) on phones. Staff and Visitors/Guests should also be informed through specific signage (information infographics, including adaptations for those who are visually impaired) at entrances of tourism facilities; recreational and entertainment areas including sites and attractions. Signage must also be located in “back-of-house” or staff-only areas for information and directional purposes of employees and other individuals in those locations.

Leaflets with information could also be provided upon request. Information on leaflets and signage in different languages, including Spanish and French should also be considered. General leaflets could include information, on:

- (i) the signs and symptoms of COVID-19;
- (ii) what to do in case they develop symptoms and signage on where to go, e.g. “Check Health Station” or “Check Resort Nurse” during their stay; and
- (iii) what to do if they develop symptoms within 14 days following departure.

✓ External Communication

Mechanisms must be in place to ensure constant communication between local/national public health/tourism authorities and sector associations. Communication with external travel trade, and sales and business partners must also be factored. They must also be kept fully apprised of what is happening locally and onsite for them to perform their function and support accordingly.

✓ Building Trust & Assurance

Certification and Recognition Programs can play an even greater role as part of Public Relations (PR) and promotional communication activities. All tourism service providers are encouraged to seek certification or recognition, where possible, including CARPHA's regional stamp of approval (Caribbean Travel Health Assurance Stamp - CTHAS).

4. TECHNOLOGY & DIGITIZATION

Physical distancing and the measures required to mitigate the spread of COVID-19 have necessitated an increased use of technology for communication and the digitization of information and processes. This must now be maximized to the highest extent possible as touchless travel will become the norm.

Evaluation of areas that could be easily digitized must be undertaken. Areas for consideration include:

- contactless payments to reduce the physical handling of cash and credit cards
- contactless/mobile phone check-ins and check-outs
- digital keys
- e-tickets purchases and e-booking for visits and entertainment
- automatic faucets
- automatic dispensers for soaps, hand sanitizers and hand towels
- automatic/contactless hand dryers; and
- contactless garbage bins

5. LIABILITY OF POTENTIAL EXPOSURE

Tourism enterprises and operations should review all areas of potential liability and incorporate waiver and disclaimer language into contracts, reservations, bookings, sales agreements, activity waiver documents etc. The new era of COVID-19 presents a possibility for increased liability claims by employees, guests, and other customers who may claim negligence as a cause for contracting the virus.

This underscores the importance of having in place protocols, training commitments, communications materials and operational practices aimed at minimizing contagion. Tourism Services Providers should include, as part of the reservation or registration process, a Disclaimer which outlines guest responsibilities and limitations of liability.

6. EVALUATION AND ADJUSTMENTS

Health safety measures should be regularly monitored, re-evaluated and adjusted. As new and more efficient solutions become available, less efficient or more burdensome measures should be discontinued.

Tourism service providers should undertake scheduled drills and tabletop exercises to further develop and refine COVID-19 measures and protocols. Evaluation should also consider any new information and approaches needed, to remain current with public health needs.

CHECKLIST OF GUIDELINES FOR ALL TOURISM SERVICES

This checklist is a summary of the recommended Guidelines.
It allows a self-check to evaluate consistency with and coverage of core areas.

REQUIRED PRIORITY GUIDELINES FOR ALL TOURISM SERVICES

<input checked="" type="checkbox"/> = Yes: <input type="checkbox"/> = No <input type="checkbox"/> = Not Applicable				
SPECIFIC COVID-19 HEALTH SAFETY MEASURES				
(1) PHYSICAL DISTANCING				
<input type="checkbox"/>	Physical Distancing in place for Communal Areas	<input type="checkbox"/>	Distancing, of 5 – 6 feet/1.5 - 2 meters, is applied to communal areas	
		<input type="checkbox"/>	Maximum numbers established for each common facility	
		<input type="checkbox"/>	Allocated slots for use of service is in place	
<input type="checkbox"/>	Alternate Measures are applied where Physical Distancing cannot be fully observed	<input type="checkbox"/>	Sneeze Guards or Impermeable barriers are used	
		<input type="checkbox"/>	Masks are required and worn over nose, mouth and chin	
		<input type="checkbox"/>	Consideration has gone into temporarily closing some services	
(2) INFECTION PREVENTION AND CONTROL (IPC) MEASURES				
Personal Protective Measures				
<input type="checkbox"/>	Specific Personal Protective Measures	<input type="checkbox"/>	Respiratory Etiquette	<input type="checkbox"/> Coughing or sneezing methods are communicated and practised
				<input type="checkbox"/> Contactless paper tissue dispensers with contactless bins are available for use
		<input type="checkbox"/>	Hand Hygiene	<input type="checkbox"/> Infographics communicate hand hygiene (washing for 20 seconds)
				<input type="checkbox"/> There is easy access to contactless hand washing facilities and/or hand sanitizers 60% alcohol base and above (for personal use)
		<input type="checkbox"/>	Face Covering	<input type="checkbox"/> Use of face covering by all is required
				<input type="checkbox"/> Appropriate type and use of face covering are communicated
Ventilation and Cleaning				
<input type="checkbox"/>	Ventilation and Cleaning Protocols are Communicated and in place	<input type="checkbox"/>	Ventilation	<input type="checkbox"/> Number of air exchanges per hour in enclosed areas are increased and as much outdoor air is supplied as possible
				<input type="checkbox"/> Cleaning of HVAC Systems has been increased and air filters replaced more frequently in indoor spaces
				<input type="checkbox"/> Rooms ventilated for at least 1 hour after guest check out
		<input type="checkbox"/>	Cleaning, Sanitizing & Disinfection	<input type="checkbox"/> Heightened cleaning procedure after visitor use of facility/service and after check-out is performed
				<input type="checkbox"/> Staff informed of the treatment of cleaning equipment, waste management, laundry, & personal hygiene following cleaning
				<input type="checkbox"/> Frequently touched surfaces are cleaned very often

CHECKLIST OF GUIDELINES FOR ALL TOURISM SERVICES

OTHER NECESSARY GUIDELINES FOR ALL TOURISM SERVICES

<input checked="" type="checkbox"/> = Yes: <input checked="" type="checkbox"/> = No <input type="checkbox"/> = Not Applicable			
The following high touch surfaces in high use/Communal areas are cleaned daily, but preferably every 2 hours, or hourly or after use. Eco-safe and recycled products are used for cleaning where relevant and as far as possible:			
<input type="checkbox"/> Doors	<input type="checkbox"/> Bar/Counter tops	<input type="checkbox"/> Light and AC Control Panels	
<input type="checkbox"/> Door Handles & Knobs	<input type="checkbox"/> Check-in/Payment Counters	<input type="checkbox"/> Remote Controls	
<input type="checkbox"/> Windows & Coverings	<input type="checkbox"/> Point-of-Sale Terminals	<input type="checkbox"/> Elevator Buttons	
<input type="checkbox"/> Seats and Chairs	<input type="checkbox"/> Dining Surfaces	<input type="checkbox"/> Touch Screens & Tablets	
<input type="checkbox"/> Seat Belt Buckles	<input type="checkbox"/> Food Preparation Surfaces	<input type="checkbox"/> Staff Personal Computers (PCs)	
<input type="checkbox"/> Arm Rests	<input type="checkbox"/> Sinks, Faucets & Water Taps	<input type="checkbox"/> Telephones	
<input type="checkbox"/> Hand Rails	<input type="checkbox"/> Keys (room) and Locks	<input type="checkbox"/> Pool/Water Safety Equipment	
<input type="checkbox"/> Grab Handles	<input type="checkbox"/> Steering Wheels	<input type="checkbox"/> Gym Equipment	
<input type="checkbox"/> Table-tops	<input type="checkbox"/> Driver/Vessel Controls	<input type="checkbox"/> Vending & ATM Machines	
(3) TEMPERATURE CHECK SCREENING			
For Staff		For Guests, Patrons, Visitors	
<input type="checkbox"/> Staff undergo daily temperature screening		<input type="checkbox"/> Temperature screening of guests is done on a regular basis during their accommodation/stay	
<input type="checkbox"/> Staff with temperature over 100.4 F/38 C is sent home and/or for further screening		<input type="checkbox"/> Temperatures of patrons are taken prior to commencing a tourism activity or tour by the activity/tour providers	
<input type="checkbox"/> Staff exhibiting other COVID-19 symptoms are sent for further screening and testing, if necessary at designated public facility		<input type="checkbox"/> Patrons with elevated temperature and or exhibiting COVID-19 symptoms are referred to the health authority for further screening and, if required must also be tested	
<input type="checkbox"/> Staff stay home if they or household member are unwell		<input type="checkbox"/> Persons displaying elevated temperatures cannot participate in planned activities	
(4) REAL-TIME MONITORING, RAPID RESPONSE & REPORTING/CONTACT TRACING			
Monitoring & Rapid Response Reporting			
<input type="checkbox"/> The WHO Symptomatic Reporting Process is in place and known by staff, i.e. Inform, Isolate, Trace, Clean and Report		<input type="checkbox"/> CARPHA THiS Daily/Regular Monitoring and Real-Time Reporting System is in place and used accordingly	
Contact Tracing			
<input type="checkbox"/> Contact details for tracing is facilitated		<input type="checkbox"/> Real-time Reporting is facilitated	
(5) SUPPLIES & ECO-FRIENDLY PURCHASES			
Supplies Checklist			
<input type="checkbox"/> Supplies Checklist is in place for key areas along the points of service		<input type="checkbox"/> On the supplies list, contactless and automatic products are purchased, as far as possible	
<input type="checkbox"/> Eco safe and recycled products are purchased, as far as possible		<input type="checkbox"/> Staff are supplied with relevant PPE for use at work	
Receiving Delivery of Supplies			
<input type="checkbox"/> Suppliers are aware that all delivery personnel cannot deliver supplies unless they are properly attired with the necessary mask/PPE		<input type="checkbox"/> If delivery personnel are denied entry due to elevated temperatures, it is documented and rapidly reported to the relevant health authority	
<input type="checkbox"/> Delivery personnel undergo temperature checks at site/property entrances		<input type="checkbox"/> Delivery receiving areas must be kept clean and disinfected after each delivery	
<input type="checkbox"/> Delivery personnel is denied entry if their temperature is elevated			
<input type="checkbox"/> Products are removed from external containers or packaging before storage. Where this is not possible or practical, packages and containers are cleaned and sanitized as appropriate prior to storage			

CHECKLIST OF GUIDELINES FOR ALL TOURISM SERVICES

OTHER NECESSARY GUIDELINES FOR ALL TOURISM SERVICES

<input checked="" type="checkbox"/> = Yes: <input checked="" type="checkbox"/> = No <input type="checkbox"/> = Not Applicable			
OTHER MANAGEMENT, OPERATIONAL AND NECESSARY MEASURES			
1. MANAGEMENT OPERATION			
Local Regulatory Compliance			
<input type="checkbox"/>	Business Compliant with Government Legislative and Regulatory Requirements		
<input type="checkbox"/>	Required Business/Operational or Reopening License in Place (where required)		
Preparedness and Action Plans			
<input type="checkbox"/>	Preparedness & Action Plan in Place	<input type="checkbox"/>	Includes actions required to deal with Infection
		<input type="checkbox"/>	Presented to each staff and available at all times
<input type="checkbox"/>	SOPs for Contagion in Place	<input type="checkbox"/>	SOPs Adjusted to include heightened Health Safety Measures
		<input type="checkbox"/>	Quarantine SOP in place
		<input type="checkbox"/>	Presented to each staff and available at all times
COVID-19 Health Safety Management Team and/or Point Person			
<input type="checkbox"/>	COVID-19 Compliance Team in place	<input type="checkbox"/>	Point Person designated to continually check and ensure compliance
Local Coordination Arrangements and Partnerships			
<input type="checkbox"/>	Arrangements in Place	<input type="checkbox"/>	With National Public Health Agency
		<input type="checkbox"/>	With Tourism Ministry
		<input type="checkbox"/>	With National Tourism/Hospitality Association (NHTA)
2. HUMAN RESOURCES AND TRAINING			
Managing Staff			
<input type="checkbox"/>	Measures in place to decrease physical contacts and time of physical contacts	<input type="checkbox"/>	Measures decreasing physical presence of staff at work
		<input type="checkbox"/>	Staff compatible with teleworking are encouraged to work from home
		<input type="checkbox"/>	Shifts in Work and in Meal Times are introduced
		<input type="checkbox"/>	Increased use of electronic means of communication
Comprehensive Training & Capacity Development Plan			
<input type="checkbox"/>	Comprehensive Plan Developed	<input type="checkbox"/>	Collaborative Approach to Training taken
Training & Capacity Development Focus Areas			
<input type="checkbox"/>	COVID-19 Causes & Symptoms	<input type="checkbox"/>	Implementing Quarantine Protocols
<input type="checkbox"/>	Physical Distancing Measures	<input type="checkbox"/>	Rapid Response Actions (required if staff or guests/visitors present symptoms)
<input type="checkbox"/>	IPC Measures & Personal Protection, including use of face covering and other PPE	<input type="checkbox"/>	Monitoring and Reporting
<input type="checkbox"/>	Interacting with visitors/guests and other staff	<input type="checkbox"/>	First Aid in a COVID-19 Environment

		<input type="checkbox"/>	Sales and Selling Skills in a COVID-19 Era
<input type="checkbox"/>	Manufacturer's instructions for use of cleaning, sanitizing & disinfecting product	<input type="checkbox"/>	Post COVID-19 Staff Counselling & Coaching

CHECKLIST OF GUIDELINES FOR ALL TOURISM SERVICES

OTHER NECESSARY GUIDELINES FOR ALL TOURISM SERVICES

<input checked="" type="checkbox"/> = Yes: <input checked="" type="checkbox"/> = No <input type="checkbox"/> = Not Applicable			
3. COMMUNICATION AND INFORMATION			
Information on Health Safety Measures			
<input type="checkbox"/>	Visitor Information	<input type="checkbox"/>	Measures at the destination is given
		<input type="checkbox"/>	Measures at the Facility/Service Provided
		<input type="checkbox"/>	Information provided prior to arrival
		<input type="checkbox"/>	Information is given in two or more languages
<input type="checkbox"/>	Staff Information	<input type="checkbox"/>	Staff Informed of Health Safety Procedure, Policies, Operations and Expectation
<input type="checkbox"/>	External Communication	<input type="checkbox"/>	Travel Trade and External Partners kept informed and updated
Building Trust and Confidence			
<input type="checkbox"/>	National Assurance Certification or Recognition Planned	<input type="checkbox"/>	CARPHA regional CTHAS Certification Planned
<input type="checkbox"/>	International Assurance Certification or Recognition Planned e.g. WTTC Safe Travel Stamp		
Communication by Signage			
<input type="checkbox"/>	Signage used at entrances to facility/site/service and at other key points	<input type="checkbox"/>	Signage used to provide information on symptoms of COVID-19
<input type="checkbox"/>	Signage used to facilitate Physical Distancing requirements	<input type="checkbox"/>	Signage provides information in two or more languages
4. TECHNOLOGY AND DIGITIZATION			
<input type="checkbox"/>	Evaluation done of Digitization Possible	<input type="checkbox"/>	Contactless Technology is used as far as possible, e.g. soap dispensers, faucets, hand dryers, paper towel dispensers, bins, for bill payments, e-ticketing etc.
<input type="checkbox"/>	Technology Needs Identified		
5. LIABILITY OF POTENTIAL EXPOSURE			
<input type="checkbox"/>	Review done of all areas of Potential Liability	<input type="checkbox"/>	Waiver & Disclaimer Language is Included in Contracts and information platforms
6. EVALUATION AND ADJUSTMENTS			
<input type="checkbox"/>	Policy in place to regularly re-evaluate and adjust measures to protect health of guest and workers		

REOPENING OF CARIBBEAN TOURISM & TRAVEL

GUIDELINES AND CHECKLIST FOR CARIBBEAN ACCOMMODATIONS

**Safe
travels**

by

WORLD
TRAVEL &
TOURISM
COUNCIL

Endorsed By:

CARIBBEAN
HOTEL & TOURISM
ASSOCIATION

OECS
Organisation of Eastern Caribbean States

CARPHA-CTO-CHTA-OECS-GTRCMC COVID-19 Task Force

September 2, 2020

OVERVIEW

Regardless of the size and type of accommodation, they are all places where guests stay temporarily in close cohabitation and where there is always a degree of interaction among staff or host and guests. This interaction may be conducive to the spread of COVID-19.

Therefore, all accommodation regardless of the type, size, and range of facilities and services offered, must adapt to co-exist in the COVID-19 environment, minimize the risk of contagion for staff and guests and assure travelers of their health safety commitment.

TARGET GROUP

The collective range of tourist accommodation in the Caribbean.

KEY MEASURES FOR CARIBBEAN ACCOMMODATIONS

To reduce introduction and spread of COVID-19 and build travelers' confidence to travel to the Caribbean, the following CARPHA-CTO-CHTA proactive COVID-19 Health Measures for Travel must be adopted by the accommodation sector:

- ✓ Implement COVID-19 specific Hospitality Operational Guidelines in accordance with WHO recommendations
- ✓ Adhere to Hospitality Health, Hygiene, Food Safety and Environmental Sanitation Standards i.e. standards required through National/Regional Health and Standards Agencies
- ✓ Advanced Certification for the adoption of Health, Hygiene and Food Safety Measures e.g. ServSafe Food and Alcohol Safety Certification for Food Service Staff and HACCP
- ✓ Join the Caribbean Travel Health Assurance Stamp for Healthier Safer Facility Program
- ✓ Ensure Real-Time Monitoring of illnesses via the confidential Early Warning and Response Web-Based System, Tourism Health Information System (THiS)¹⁴
- ✓ Encourage Voluntary Self-Reporting of Illness via THiS or a COVID-19 App
- ✓ Effectively handle and response to COVID-19 cases in hotels and tourism accommodation establishments
- ✓ Undertake Training and Capacity Building (especially of frontline staff)
- ✓ Engage relevant communities and stakeholders and collaborate on public health messaging

FOCUS

Implementing Health Safety Measures at key points of the guest experience at the hotels and tourist accommodations.

PRIORITY

- ✓ Health Safety and Quality Service
- ✓ Health Safety Assurance
- ✓ Education and Training
- ✓ Clear Communication and Messaging
- ✓ Collaboration and Partnerships

¹⁴ Regional Travelers' Health Program (THP) <http://carpha.org/What-We-Do/Tourism-and-Health-Programme> or this.carpha.org

GUIDELINES FOR CARIBBEAN ACCOMMODATIONS

KEY POINTS IN THE GUEST EXPERIENCE AT ACCOMMODATIONS

SEVEN (7) COMMON HEALTH SAFETY ELEMENTS

GUIDELINES

Guidelines are provided in Checklist Format in **Section 5.1** and covers the following five (5) core areas:

(1) MANAGEMENT OPERATIONS & PROCEDURES

Operation excellence is a key factor in the reopening of F&B operations. F&B operations must not only adhere to the health, hygiene and food safety and environmental sanitation standards but should consider enhancing all areas to address the specific requirements of COVID-19. Readiness Plans and Policies and SOP must also be addressed under management operations.

(2) HUMAN RESOURCES AND TRAINING

Staff readiness is critical to the execution of COVID-19 actions and readiness plans, policies and protocols. Staff must be fully aware of and well-trained – measures are provided accordingly.

(3) HEALTH SAFETY & HYGIENE MEASURES FOR A SAFE EXPERIENCE

These measures ensure physical distancing; the application of Infection Prevention and Control (IPC) requirements such as hand washing/sanitizing; use of PPE; ventilation; and cleaning, sanitizing and disinfecting. Focus is placed on core measures for:

- | | |
|--|----------------------|
| ✓ Staff, Guest, Suppliers/Contractors | ✓ Rooms/Housekeeping |
| ✓ Arrival/Check-in/Out/Front Desk | ✓ Food and Beverage |
| ✓ Key Areas of Facilities, Amenities, and Recreation | |

(4) HEALTH SAFETY & HYGIENE MEASURES FOR A SAFE EXPERIENCE

Clear, consistent, and enhanced communication measures are encouraged with staff, guests and stakeholders. Relevant measures are provided for use as appropriate.

NB: Along with these Guidelines, reference should be made to **Section 3: “Guidelines for All Sub-Sectors of Tourism”**.

CHECKLIST OF GUIDELINES FOR CARIBBEAN ACCOMMODATIONS

This checklist is a summary of the recommended Guidelines and its Key Elements. It allows a self-check for comparison and to evaluate consistency with and coverage of core areas given size and nature of operation.

COMMON REQUIRED COVID-19 HEALTH SAFETY MEASURES

<input checked="" type="checkbox"/> = Yes: <input checked="" type="checkbox"/> = No <input type="checkbox"/> = Not Applicable							
GENERAL COVID-19 HEALTH SAFETY MEASURES: COMMON FOR ALL AREAS OF OPERATION							
Physical Distancing	<input type="checkbox"/>	Physical Distancing in place for Communal Areas	<input type="checkbox"/> Distancing, of 5 – 6 feet/1.5 - 2 meters, is applied to communal areas				
			<input type="checkbox"/> Maximum capacity numbers are established for each common facility				
			<input type="checkbox"/> Allocated slots for use of services are in place				
	<input type="checkbox"/>	Alternate Measures are applied where Physical Distancing cannot be fully observed	<input type="checkbox"/> Glass or plastic barriers are used <input type="checkbox"/> Face coverings are required				
Infection Prevention (IPC) Measures: Specific Personal Protective Measures and Cleaning Protocols are Communicated and in place	<input type="checkbox"/>	Respiratory Etiquette	<input type="checkbox"/> Coughing or sneezing methods are communicated				
			<input type="checkbox"/> Contactless hand dryers and paper tissue dispensers with contactless bins are available for use				
	<input type="checkbox"/>	Hand Hygiene	<input type="checkbox"/> Infographics are used to communicate hand hygiene				
			<input type="checkbox"/> There is easy access to contactless hand washing facilities and/or hand sanitizers 60% alcohol base and above				
	<input type="checkbox"/>	Face Covering	<input type="checkbox"/> Use of face covering by all is required				
			<input type="checkbox"/> Appropriate type and use of face covering are communicated				
	<input type="checkbox"/>	Ventilation	<input type="checkbox"/> Number of air exchanges per hour in enclosed areas are increased and outdoor air is supplied as far as possible				
			<input type="checkbox"/> Cleaning of HVAC Systems has been increased and air filters replaced more frequently in indoor spaces				
			<input type="checkbox"/> Rooms ventilated for at least 1 hour after guest check out, and ideally 24 hours between check-out/in				
	<input type="checkbox"/>	Cleaning & Disinfection	<input type="checkbox"/> Heightened cleaning procedure after guest use of facility/service and after check-out is performed				
<input type="checkbox"/> Staff informed of the treatment of cleaning equipment, waste management, laundry, & personal hygiene following cleaning

CHECKLIST OF GUIDELINES FOR CARIBBEAN ACCOMMODATIONS

OTHER OPERATIONAL GUIDELINES

		✓☑ = Yes:	X☒ = No	☐ = Not Applicable
☐	Training Delivery	☐	Training is conducted utilizing strict physical distancing and hygiene protocols	
		☐	Online training modules are used as far as possible	
		☐	Collaborative Training Approach taken (with Tourism/Health Authority, Association etc.)	
☐	All staff trained in new COVID-19 SOPs and Protocols (general and for their specific area of operation) including:	☐	COVID-19 Organizational Plans Policies and Procedures	
		☐	COVID-19 Causes and Symptoms	
		☐	Physical Distancing Measures & Interacting with staff and guests	
		☐	Respiratory Etiquette & Personal Hygiene (IPC)	
		☐	New Cleaning and Disinfecting Protocols for their area of work (IPC)	
		☐	Handling suspected COVID-19 Guests/Actions required in case Guests present symptoms	
		☐	Code of Conduct: List of expected Behaviour for Staff and Operations	
		☐	First Aid in a COVID-19 Environment	
		☐	Selling skills in the new reality of physical distancing (for brand staff)	
☐	Post COVID-19 Staff Counselling & Coaching			
SPECIFIC HEALTH SAFETY & QUARANTINE MEASURES				
1. MEDICAL FACILITY & TEMPORARY QUARANTINE HOLDING AREA				
☐	Where possible, a medical station is part of the on-property facilities	☐	Formal 24-hour service access arrangements with a medical practitioner in close proximity is in place	
☐	There is easy access to COVID-19 testing	☐	There is a Temporary Quarantine or Isolation Room/Area where guests that display symptoms will remain while further screening is done (staff/guest are sent to public quarantine facility if confirmed positive)	
NB: <ul style="list-style-type: none"> In the case of affected/ill guests, continued stay in the establishment is not recommended The person can be isolated in a room on a temporary basis until the intervention of local health authorities, and provided the room is not shared with other guests No visitors should be permitted to enter the room occupied by the affected guest Depending on the availability of rooms, accompanying persons, if any, should be moved to a different room 				
2. MANAGING EMPLOYEE HEALTH & SAFETY				
☐	Staff must have proof of medical clearance from a doctor within 7 – 10 days prior to returning to work that permits the staff to work (particularly if the staff has underlying conditions but must work)	☐	Staff temperature is checked daily by the hotel even when they are not displaying COVID-19 symptoms (Staff with temperatures over 100.4 F/38 C are not allowed to work.)	
☐	Staff with underlying conditions is limited during initial reopening or recalled at a later date (The prevailing Labour laws of the destination must be considered)	☐	Staff are required to stay at home if they, or a household member, are not feeling well or exhibiting WHO-defined symptoms associated with COVID-19. They are required to consult and follow the health authority guidelines	
☐	If staff with underlying conditions must work, they are placed, where possible, in positions that minimize risk, i.e. areas which are not in direct contact with guest and less contact with other staff	☐	Staff who appears sick at work is sent home. Their workspace surfaces are cleaned and disinfected. Other staff with close contact (i.e., within 6 ft (2 m) of the employee during this time are considered exposed	
☐	Staff who are well but know they have been exposed to COVID-19, are required to notify their supervisor and follow precautions set by the health authority.	☐	If staff tests positive, an immediate notification process is in place to the Health Authority for contract tracing	

CHECKLIST OF GUIDELINES FOR CARIBBEAN ACCOMMODATIONS

OTHER OPERATIONAL GUIDELINES

<input checked="" type="checkbox"/> = Yes: <input checked="" type="checkbox"/> = No <input type="checkbox"/> = Not Applicable	
Operational Guidelines for Staff	
<input type="checkbox"/> Staff adheres to the daily temperature screening protocol done on arrival at work/start of a shift	<input type="checkbox"/> Staff sanitize or wash hands regularly throughout their shift (minimum once per 30 minutes)
<input type="checkbox"/> Upon arrival/start of a shift and after temperature screening clearance, staff change into a fresh set of work-required uniform	<input type="checkbox"/> Staff sanitize or wash hands after handling cash or credit card exchanges, handling items from a guest, touching common areas and upon serving food and drinks
<input type="checkbox"/> Staff are not encouraged to wear uniforms outside of the work setting	<input type="checkbox"/> Staff operations include defined sanitization areas and foot pressed bins at strategic points
<input type="checkbox"/> Staff is required to wear a face covering	<input type="checkbox"/> Staff has implemented enhanced cleaning and disinfection processes that also requires frequent hand washing at easily accessible stations across the property
<input type="checkbox"/> The use of other PPEs by staff, e.g. aprons, face shield, cleaning gloves, is used where and when necessary	<input type="checkbox"/> COVID-19 processes have been implemented for housekeeping and maintenance persons who access guest rooms to clean or repair
<input type="checkbox"/> Staff sanitize or wash hands regularly throughout their shift (minimum once per hour)	<input type="checkbox"/> A process for sanitising linen, towels etc. has been established and is followed by staff
<input type="checkbox"/> Approved disinfecting products that are effective against viruses are used in a safe and controlled manner	
3. GUEST HEALTH SAFETY	
<input type="checkbox"/> Guest temperature is checked daily or as determined by the property	<input type="checkbox"/> Guests are encouraged to wear face coverings in areas with close physical contact
<input type="checkbox"/> Guests must inform the hotel of any serious (or any) underlying conditions for which special attention may be required	<input type="checkbox"/> The CDC "Management Process for Symptomatic Visitors" is in place, i.e.: (1) Inform: Health Authority (2) Isolate: within a designated quarantine or isolation space (3) Trace: in collaboration with health authority (4) Clean: Thoroughly sanitize spaces used/visited by the person; and (5) Report: Share all information gathered with relevant authority
<input type="checkbox"/> Guest are encouraged to have travel health insurance in the event they become symptomatic and subsequently tests positive	
<input type="checkbox"/> If guests test positive during their stay at the hotel, they must remain at the destination, at their expense, until they test negative, as they would not be allowed to fly/leave the destination	
4. OPERATIONAL GUIDELINES FOR SUPPLIERS AND CONTRACTORS	
<input type="checkbox"/> The use of face coverings by suppliers, contractors and delivery personnel when on property is mandated and enforced	<input type="checkbox"/> An area is established where Food & Vegetables are washed & sanitized
<input type="checkbox"/> A suppliers' delivery schedule is in place to avoid delivery congregation	<input type="checkbox"/> Farmers are advised and encouraged to deliver washed produce
<input type="checkbox"/> Protocols for receiving food are in place and applied	<input type="checkbox"/> Receiving areas are disinfected after each delivery
<input type="checkbox"/> Individuals delivering food and supplies and, as far as possible, anyone else coming on to the property undergo temperature checks	<input type="checkbox"/> Transportation Suppliers have committed to ensuring: (1) frequent sanitization, particularly between trips (2) that employees observe physical distancing, and (3) that employees wear a mask (4) compliance with all standards provided by local authorities regarding maximum capacities on buses

CHECKLIST OF GUIDELINES FOR CARIBBEAN ACCOMMODATIONS

OTHER OPERATIONAL GUIDELINES

<input checked="" type="checkbox"/> = Yes: <input checked="" type="checkbox"/> = No <input type="checkbox"/> = Not Applicable			
KEY POINTS OF THE GUEST EXPERIENCE			
1. FRONT DESK SERVICES: ARRIVAL EXPERIENCE, CHECK-IN/OUT			
Arrival/Departure			
<input type="checkbox"/>	Space is designated for guest drop off and pick-up	<input type="checkbox"/>	Front doors are placed open to limit touch or manned to mitigate excessive surface contact by multiple individuals
<input type="checkbox"/>	Queuing system with physical distancing space marking is in place for guest drop-off/pick-up	<input type="checkbox"/>	Touch-less hand sanitizer dispensers with 60% alcohol-base (or above) are placed near entrances and exits and at regular intervals throughout the arrival and front desk/lobby areas
<input type="checkbox"/>	Guest temperature is checked upon arrival	<input type="checkbox"/>	
<input type="checkbox"/>	Automatic doors are utilised where possible	<input type="checkbox"/>	
Valet Parking			
<input type="checkbox"/>	Self-parking is encouraged as far as possible	<input type="checkbox"/>	Attendants wear face coverings
<input type="checkbox"/>	Where valet parking is necessary, a queuing experience that allows for proper physical distancing has been created	<input type="checkbox"/>	Attendants disinfect vehicle door, keys, steering wheel, and gear shift upon returning the vehicle to the owner
<input type="checkbox"/>	Valet stands are disinfected hourly and include appropriate marking for physical distancing	<input type="checkbox"/>	Payment options to allow for a contactless experience, where practical, is implemented
Check-In/Out/Front Desk			
<input type="checkbox"/>	Check-in/out is contactless and digitalized	<input type="checkbox"/>	Guests are given a printed or electronic copy of health safety protocols on property
<input type="checkbox"/>	For in-person check-in/out a guest queuing experience is in place with physical distancing	<input type="checkbox"/>	Where possible, offering complimentary WIFI, is considered to encourage use of digital check-in/out and other services
<input type="checkbox"/>	At check-in/out counters, physical barriers are used, where possible	<input type="checkbox"/>	WIFI texting features are encouraged as a primary form of communication in an effort to minimize the use of guest room phones
<input type="checkbox"/>	Guests must complete a travel declaration and contact tracing form if not done electronically	<input type="checkbox"/>	Staff sanitize their hands before and after each guest transaction
<input type="checkbox"/>	Waiver & Disclaimer Language is Included in Contracts signed by guest		
Keys			
<input type="checkbox"/>	Digital key cards or disposable key cards utilized when possible	<input type="checkbox"/>	Room keys are disinfected prior to providing to guest
<input type="checkbox"/>	For traditional keys central drop boxes are utilized with a disinfecting schedule	<input type="checkbox"/>	Room cards are sanitized and delivered by staff to guests by basket drop-offs
<input type="checkbox"/>	Keys are no longer held at the front desk on behalf of guests to limit the number of times the key is exchanged		
Luggage		Concierge/Information	
<input type="checkbox"/>	Bellman sanitize or wash hands after handling luggage	<input type="checkbox"/>	Touch contact is minimized, where possible, by digitizing guest services such as digital maps, e-menus, virtual personal shopping, roving concierge
<input type="checkbox"/>	If disposable gloves ¹ are required to handling certain luggage, they are disposed after each use in a hands-free garbage bin with a cover	<input type="checkbox"/>	Shared brochures and magazines have been discontinued and replaced with digital content

¹ CDC recommends wearing gloves when you are cleaning or caring for someone who is sick. Otherwise, washing hands for 20 seconds with running water and wearing face masks along with other preventative measures such as physical distancing and using hand sanitizers are seen as most appropriate for daily activities.

CHECKLIST OF GUIDELINES FOR CARIBBEAN ACCOMMODATIONS

OTHER OPERATIONAL GUIDELINES

✓☑ = Yes: X☑ = No –☐– =Not Applicable	
<input type="checkbox"/> Bellman do not enter the guest room when dropping off luggage. It is left outside for the guest to take into the room	<input type="checkbox"/> Some brochures and pamphlets are retained behind the desk/counter for distribution and are provided based only on guest requests
<input type="checkbox"/> Luggage carts are sanitized after each use	<input type="checkbox"/> Hand sanitizer and hands-free garbage bins with covers are available for use in the concierge area
<input type="checkbox"/> Only staff are allowed to access luggage storage rooms	<input type="checkbox"/> Stands, desks, chairs, computer, keyboard etc. are continually disinfected
Lobby, Elevators, Stairs	
<input type="checkbox"/> Lobby furniture are repositioned to allow physical distancing	<input type="checkbox"/> Elevator capacity is reduced – signage indicates new capacity is in place and clearly visible to elevator users
<input type="checkbox"/> High-touch areas including elevator button panels and stair handrails are cleaned regularly	<input type="checkbox"/> A Hand Sanitizer station is placed near the entrance to the elevator and, where possible, near entrances to stairways
Restrooms	
<input type="checkbox"/> Restrooms are regularly clean and sanitized (at a minimum every two hours)	<input type="checkbox"/> Touchless paper towel dispensers and Hands-free garbage bins with covers are utilized for no touch waste disposal
<input type="checkbox"/> Contactless faucets and soap dispensers are provided	<input type="checkbox"/> Covered foot pressed bins are available for use
<input type="checkbox"/> Signage is in place to require that toilet covers are closed when flushing especially for those cleaning the bathrooms (particles can be sent airborne several feet high in the air if not closed)	
2. ROOMS/HOUSEKEEPING/ROOM DELIVERY	
<input type="checkbox"/> Moveable decorations or room amenities are removed to limit guest touching	<input type="checkbox"/> All trash bins are lined to make it easier to collect and dispose of waste
<input type="checkbox"/> All in room guest delivery & minibars are temporarily suspended	<input type="checkbox"/> Nightly or evening turndown service is discontinued to facilitate minimal contact and entry into the guest room
<input type="checkbox"/> Extra pillows, blankets, linens etc. in the room are removed to limit exposure	<input type="checkbox"/> Guests are offered the option for a relaxed housekeeping schedule where cleaning occurs less frequently as opposed to each day
<input type="checkbox"/> Staff are required to wear face coverings, aprons and close-toed shoes when servicing each room	<input type="checkbox"/> Requested room items are delivered in an individual single use wrapping, whenever possible consider sustainable and eco-friendly solutions
<input type="checkbox"/> Cleaning carts and all tools are disinfected before and after each shift	<input type="checkbox"/> A contactless procedure is in place for delivering guest requested items (left outside the room door with a knock to alert guest before departure)
<input type="checkbox"/> All soiled linens and towels are removed and placed in a bin with a cover for transport to the back-of-house/laundry	<input type="checkbox"/> If a current guest is sick, their room (after check out) is immediately removed from inventory until the entire room has undergone an extensive deep clean process
3. FOOD & BEVERAGE: RESTAURANTS & BARS (An expanded F&B Checklist is available in Food & Beverage Operations Guidelines)	
<input type="checkbox"/> Restaurants and bars are reconfigured to accommodate physical distancing with reduced seating capacity	<input type="checkbox"/> Cutlery is not laid out but wrapped and place on tables
<input type="checkbox"/> Initially, a temporary capacity reduction to 50% with rotational or extended dining times are considered	<input type="checkbox"/> Food preparation, handling and service staff wear face covering, and hairnets/hats and wash hands regularly or at least every 30 minutes
<input type="checkbox"/> Tables are spaced at least 6 ft (2 m) from each other in compliance with physical distancing protocols	<input type="checkbox"/> Staff maintain protocol for physical distancing and delivery of service with the enhanced food safety handling measures
<input type="checkbox"/> The re-seating floor plan that reflects physical distancing protocols is posted at the entrance for viewing of guests/patrons	<input type="checkbox"/> Procedures and equipment are in place to ensure that cutlery and wares are properly cleaned and sanitized. Pre-setting tables are avoided as far as possible

CHECKLIST OF GUIDELINES FOR CARIBBEAN ACCOMMODATIONS

OTHER OPERATIONAL GUIDELINES

<input checked="" type="checkbox"/> = Yes: <input checked="" type="checkbox"/> = No <input type="checkbox"/> = Not Applicable	
<input type="checkbox"/> A reservations system for the restaurant to ensure better control of seating and number of persons is implemented and reservation is encouraged	<input type="checkbox"/> Frequency of cleaning, disinfecting and sanitizing food and high-touch surfaces including menus, if used, are increased. If reusable menus must be used, they are cleaned and sanitized regularly. Paper menus are discarded after each customer use
<input type="checkbox"/> Open buffet is eliminated if the use of protective panels and an attendant are not possible	<input type="checkbox"/> Eco-friendly products approved as effective disinfectants against COVID-19 are utilised
<input type="checkbox"/> Single-use, individually sealed food items are used where practical (e.g., condiments, individual bottled water in lieu of water carafes or stations)	<input type="checkbox"/> Digital Point of Sale (POS) systems are used where possible to reduce cash transactions
<input type="checkbox"/> All shared items at the bar are removed, e.g. napkins, toothpicks, ashtrays and available on request	<input type="checkbox"/> Patrons are notified of preference for cashless payments prior to entering so they may plan accordingly
<input type="checkbox"/> Areas behind the bar are designated exclusively for drink preparation	<input type="checkbox"/> Glass/plexiglass shields around certain areas of the cashier stations, if possible, are installed to create a barrier between patrons and cashiers
<input type="checkbox"/> Bartenders wash hands between making an order of drinks	<input type="checkbox"/> Food and beverage contact surfaces, dishware, utensils, food preparation surfaces, and beverage equipment are cleaned and sanitized after use
<input type="checkbox"/> Dishwashing protocols are heightened	
<input type="checkbox"/> Bar area is cleaned at regular intervals	<input type="checkbox"/> The recommendation that Bar and Restaurant staff are ServSafe Certified is considered
<input type="checkbox"/> Smaller than normal inventories are maintained in the event of possible contamination and the need to destroy stored items	<input type="checkbox"/> HACCP process is in place/Standards are met
4. FACILITIES, AMENITIES & ENTERTAINMENT	
Facility Upgrade & Maintenance	
<input type="checkbox"/> Where national protocols have been required, plant and associated fixtures and fittings have been inspected and gaps for upgrade/modification according to health protocols identified	<input type="checkbox"/> Extensive cleaning & sanitizing of all furniture and equipment is undertaken and maintained
<input type="checkbox"/> Hand washing and/or hand sanitizing stations as well as foot pressed bins are installed at key points and in all facilities across the property	<input type="checkbox"/> Cleaning of HVAC systems are increased and air filters replaced more frequently throughout the property
<input type="checkbox"/> Services that cannot support physical distancing and health & safety requirements are suspended, e.g. playgrounds, drinking fountains	<input type="checkbox"/> Additional staff members are added in high-traffic areas, which include restrooms, lobbies and other public areas
<input type="checkbox"/> Items that have been previously lent to guests are suspended including umbrellas and pushchairs	<input type="checkbox"/> First Aid kits have been updated to include face masks, shields, extra gloves etc.
Entertainment & Recreation	
<input type="checkbox"/> Social/cultural activities are limited to those that can be accomplished from a safe, physical distance of 6 ft. (2 m) e.g. musical performances, dance shows etc.	<input type="checkbox"/> High risk activities and services and off-property activities and entertainment are guided by the National/Local Health & Tourism Authorities
<input type="checkbox"/> 6 ft (2 m) of space between patron and performers on stage or the designated stage area is adhered to	<input type="checkbox"/> Mainly on-property recreational activities and entertainment are encouraged during initial reopening phase (known by staff and guests)
<input type="checkbox"/> Microphones are sanitized prior to each use for musical and karaoke activities	<input type="checkbox"/> Outdoor Physical Distancing Protocol and reduced capacity is required for pools; decks and other open-air activity areas
Pools	
<input type="checkbox"/> Special attention is paid to extensive cleaning and maintenance of pools	<input type="checkbox"/> Designate no-touch towel return bins are available for guests to deposit towels without staff handling them

CHECKLIST OF GUIDELINES FOR CARIBBEAN ACCOMMODATIONS

OTHER OPERATIONAL GUIDELINES

✓☑ = Yes: X☑ = No –☑ = Not Applicable	
<input type="checkbox"/> Water in pools are automatically and continuously disinfected through existing equipment and processes	<input type="checkbox"/> All pool furniture and common areas are cleaned frequently per an established COVID-19 cleaning schedule
<input type="checkbox"/> When practical, all movable pool furniture is spaced to encourage physical distancing	<input type="checkbox"/> Dancing entertainment on the pool deck is allowed pending sufficient room on the pool deck for physical distancing between participants and the entertainment leader
<input type="checkbox"/> Patrons are not allowed to take towels; they are handed by an employee wearing gloves	<input type="checkbox"/> Shared pool games throughout the day e.g. Ping-Pong, volleyball, connect four, Jenga etc. are temporarily discontinued
Gym/Fitness Centre	
<input type="checkbox"/> The capacity of the gym has been revised to facilitate physical distancing based on a recommendation of approximately 113 sq. ft. (34 sq. m) per person/group	<input type="checkbox"/> Provide towels to patrons on request. Self-service towel stands have been removed and towels are given upon the request of patrons
<input type="checkbox"/> The spacing and lay-out of gym equipment has been adjusted for physical distancing	<input type="checkbox"/> Garbage bins with a no-touch foot pedal are strategically located in the gym
<input type="checkbox"/> Signage including floor markers are utilized throughout to inform and provide direction	<input type="checkbox"/> Sanitizing spray and single-use cloths to wipe gym equipment before and after each use are provided.
<input type="checkbox"/> As part of the facilities upgrade, hand sanitizers are installed at the entrance areas and patrons are required to use as they enter	<input type="checkbox"/> A regular sanitizing regime has been established for all areas, furniture and equipment within the gym
<input type="checkbox"/> Guests are encouraged to shower and refresh in their rooms	<input type="checkbox"/> Class size for fitness activities have been reduced based on physical distancing requirements
<input type="checkbox"/> Gym laundry is transported in closed bags	<input type="checkbox"/> Considerations have gone into discontinuing cardio fitness classes
Spa and Wellness Facility	
<input type="checkbox"/> Signage including floor markers are utilized at the entrance and throughout to inform and guide patrons	<input type="checkbox"/> Changing room showers are discontinued for the time being. Patrons are encouraged to shower and refresh on their own premise
<input type="checkbox"/> Temperature of all patrons are taken prior to commencing a treatment and denied if it is elevated (over 100.4 Fahrenheit or 38 Celsius)	<input type="checkbox"/> Garbage bins with a no-touch foot pedal are strategically located throughout the facility
<input type="checkbox"/> Questions are added to the Spa Health/Medical forms that ask about potential exposure to COVID-19	<input type="checkbox"/> Treatment providers are trained in IPC measures and adhere to the hygiene and PPE requirements
<input type="checkbox"/> All shared items are removed, e.g. self-service refreshments, reusable towels, book, and hygiene goods. These are packaged and provided individually	<input type="checkbox"/> Spa treatments in the menu which include touching of the face, nose and mouth e.g. facials, lip scrubs etc. are discontinued
<input type="checkbox"/> Hand sanitizer stations are at the entrance to the bathrooms and/or inside and include wipes (where possible) to allow patrons to wipe down lockers before and after use	<input type="checkbox"/> Sauna is discontinued until further notice
<input type="checkbox"/> The reception and all other areas are cleaned, sanitized and disinfected based on a developed plan	<input type="checkbox"/> Spa laundry is transported in closed bags adhering to hygiene and PPE measures
